

Hyris Software Solutions

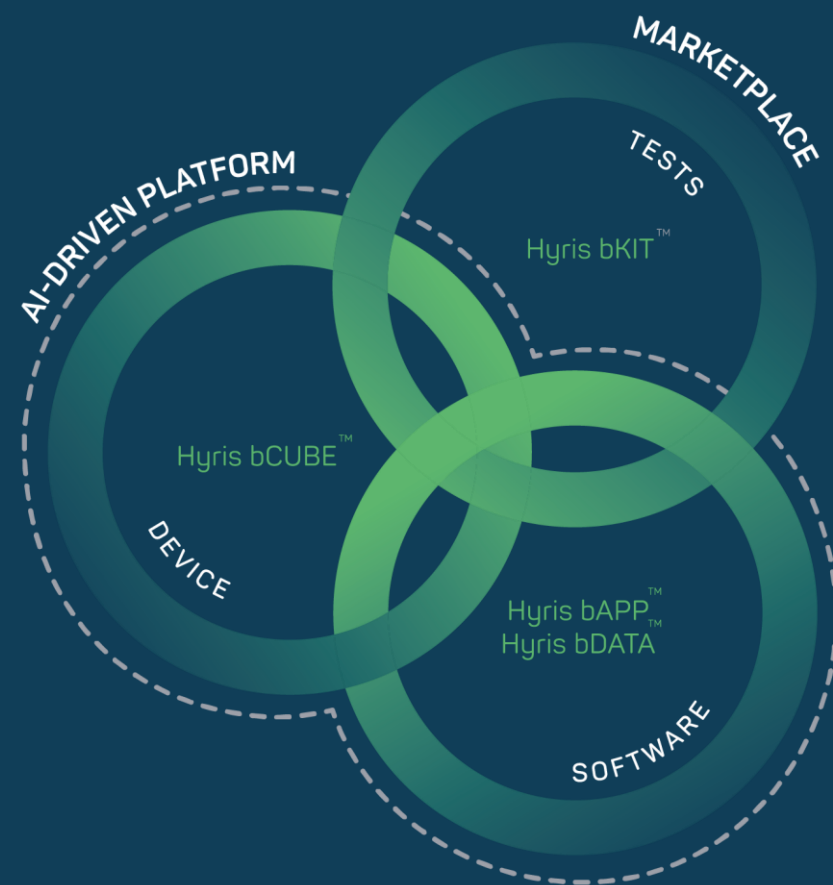

AI-DRIVEN SOLUTIONS

HYRIS bAPP™
HYRIS bDATA™

JUNE 2022

Hyris offers an AI-driven technology platform that enables genetic testing of biological samples in any setting, at any time.

Hyris System™ is a smart, efficient and effective solution.

Hyris Software Solutions

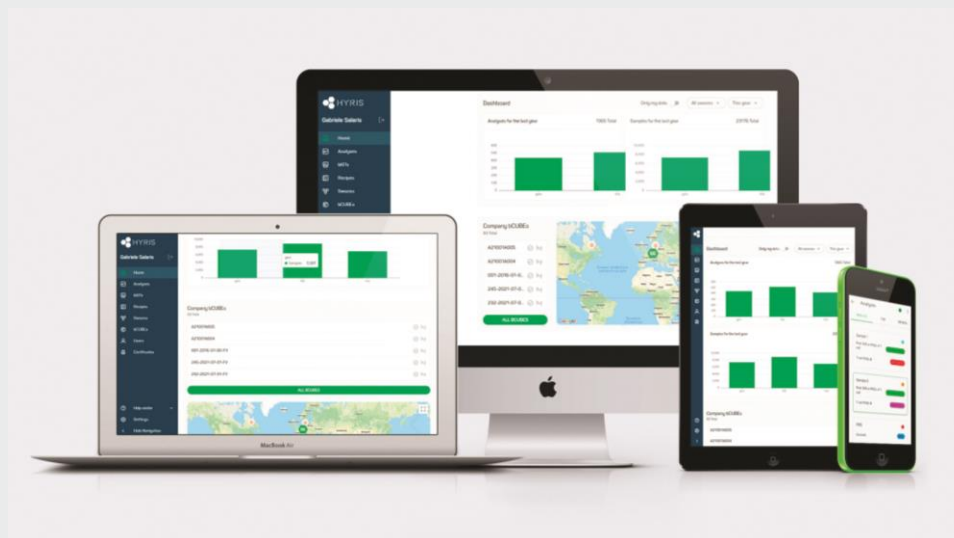

Hyris provides a proprietary integrated platform which allows to operate the Hyris System™.

HYRIS bAPP™ and **HYRIS bDATA™** features are seamlessly integrated. Users benefit from both with same login and interface.

HYRIS bAPP™

Web-based software with proprietary AI-modules.

Does all the job of a molecular biologist, easily launching analysis, obtaining results with automatic data interpretation, easy to read, thanks proprietary AI-modules.

HYRIS bDATA™

Cloud platform to store and aggregate data, enabling access to analytics and insights.

Leveraging data are aggregated in an intuitive, powerful database, allowing you to find trends and enabling AI and data analyses for all stakeholders at anytime.

Hyris Software Solutions

Hyris offers its compelling software solutions to two main categories of users, that benefit of a dedicated experience.

HYRIS SYSTEM™ FINAL USERS

Operators and customers that run activities on Hyris System™

HYRIS PARTNERS

Distributors, research partners or marketplace developers

HYRIS SYSTEM™ FINAL USERS

RUN ANALYSES

Setup, initialise and launch analyses leveraging a user-friendly and quick flow.

INTERFACE WITH OTHER SYSTEMS

Export data in customizable formats or APIs.
Hyris bDATA™ can ingest data coming from other PCR platforms, enabling hybrid setup with third-party devices and Hyris AI features.

MANAGE DEVICES

Manage HYRIS bCUBE™ in use in your company, by monitoring their status, localising them and keeping them updated to latest releases

GET SUPPORTED

Chat with our bot for immediate help or access Hyris Help Center.
Easily open support tickets in multi-channel options.
Hyris bAPP™ is available in 8 languages (English, Italian, French, German, Spanish, Russian, Chinese, Arabic).

ACCESS RESULTS

Access already interpreted results, thanks to AI proprietary modules.

ORGANISE ACTIVITIES

Define different hierarchical roles for the different company users (Admin, Manager, Operators).
Organise working groups in "swarms", allowing to perform activities, share analyses results and improve collaboration

COMING SOON

Improved analytics dashboards, to include more use cases and generate more insights.
Introduction of a notifications system to customise notification rules from the system

HYRIS PARTNERS

Hyris partners, distributor and marketplace developers can access the software solutions benefitting from all final users features. They get also access to more powerful tools.

AUTOMATIC INTERPRETATION RULES

Marketplace developers and partners can directly instruct the platform with rules and conditions for results interpretation.

The rule set definition engine excludes software coding.
User interface is intuitive and simple.

MANAGE OWN CLIENTS

Distributors and partners can directly support their own clients, by managing their devices and users, and helping with analyses results and interpretation issues

IMPROVED ANALYTICS (COMING SOON)

Improved analytics dashboards, to include more use cases and generate more insights.
Introduction of a notifications system to share information directly within the system with own clients.

CUSTOM RECIPES

Partners can develop their own recipes and thermal protocols.
The creation flow is user-friendly, yet allows to define many settings, parameters and options.

POST MARKET SURVEILLANCE (COMING SOON)

IVD-R regulation introduced more duties for kit manufactures in terms of post market surveillance of their products.
Marketplace developers can access analytics and HYRIS bDATA™ to monitor kit lots post market performance, evaluate in-field usage, prevent fore coming issues and act proactively.
